

# Salt Dough Handprint Ornaments Gift

I like the idea of making beautiful DIY ornaments for the Christmas tree every year.

If you include hand print crafts you can see how your kids have grown each year.

## Ingredients for clay:

- 4 cups of flour
- 1 cup salt
- Water to mix

## What you'll need

- Permanent Marker
- Salt
- Rolling pin
- Paint
- Glitter
- Flour
- Water

## Steps

1. In a mixing bowl, add the salt and flour and gradually add water and mix.

It's quite tricky to get the consistency right but it comes out right with a few tries

2. Once your dough is the right consistency, roll it out thickly with a rolling pin
3. Add a hole with a straw to the top where you want to make the handprint
4. Press your kids hand in the dough under the little hole
5. Cut a circle around the hand print to make the shape of the ornaments
6. If you want to you can paint the handprints or add glue and glitter to it
7. Place in a 150 degree oven for an hour. Or you can air dry over night for 24 hours.
8. Add a ribbon through the hole in the ornament
